Professional Profile

Data Scientist with an MSc in Data Science and professional experience building automated data pipelines and reporting systems. Strong technical foundation in Python, statistics, machine learning, data engineering, and data visualization. Throughout my professional development, I have stood out for turning complex problems into scalable, impactful data products, combining analytical judgment, continuous learning, technical leadership, and strong problem-solving skills. I am currently focused on applying data science to sports and football analytics, with the vision of expanding the impact of new technologies and analytical modeling in the sports industry, strengthening data-driven decision-making.

Key Experience

Plusmining

Data Scientist

Santiago, Chile

Feb 2026 — Present

- Lead the development of internal data products, collaborating with senior analysts to translate business intelligence needs into analytical tools used by non-technical users.
- Design and maintain automated data pipelines that integrate heterogeneous sources, reducing manual work by more than 22 hours per month and increasing analytical coverage by 20%.
- Architect and deploy a production-grade full-stack platform to centralize internal tools, using FastAPI, Next.js/React, OAuth 2.0, and cloud services.
- Build and deploy production LLM agents to support report drafting and review workflows.
- Prepare and present market intelligence reports, combining operational, financial, and strategic analysis.

Data & Market Analyst

Aug 2025 — Feb 2026

- Engineer automated data workflows to ingest, process, and structure unstructured market data from multiple external sources.
- Produce monthly and semi-annual market intelligence reports assessing production, financial performance, trends, and strategic developments.

Market Analyst

Jan 2025 — Aug 2025

- Automate data collection workflows and analyze operational and financial data across national and international mining companies.

Junior Analyst Intern

Sep 2024 — Dec 2024

- Collect, consolidate, and analyze operational data to support client-facing reports, presentations, industry benchmarks, and internal research outputs.

Education

Adolfo Ibáñez University

Master of Science in Data Science

Santiago, Chile

Jul 2023 — Jan 2025

- **Thesis:** *Estimation of heavy metal concentrations in tailings dams using multispectral satellite imagery.*
- Developed supervised machine learning models to estimate metal content in tailings deposits in Chile.
- Tested and compared regression models, improving predictive performance by approximately 10%.
- Worked with heterogeneous geospatial, environmental, and industrial datasets to support predictive modeling tasks.
- Collaborated with public and private-sector stakeholders to collect, validate, and structure relevant data for the research project.

Adolfo Ibáñez University

Industrial Civil Engineering, Business Analytics

Santiago, Chile

Mar 2019 — Dec 2023

Skills

Programming Languages	Python, SQL, R, TypeScript, Git
ML & Data Science	pandas, NumPy, scikit-learn, TensorFlow, PyTorch, XGBoost, statistical modeling, regression, classification, clustering, time series, model evaluation
AI & LLM Engineering	LangChain, LangGraph, prompt engineering, AI agent workflows
Full-Stack Development	Next.js, React, FastAPI, Tailwind CSS, REST APIs, Server-Sent Events, async Python, OAuth 2.0, PostgreSQL
Cloud & Data Pipelines	Google Cloud Platform, BigQuery, ETL pipelines, Scrapy, BeautifulSoup, Playwright, structured and unstructured data processing
Visualization	Power BI, Looker Studio, Tableau, Plotly, matplotlib
Languages	Spanish: Native; English: Full professional proficiency

Awards & Recognition

- Academic Excellence Scholarship, Universidad Adolfo Ibáñez, awarded for four consecutive years.
- 2024 Industry Applied Master's Thesis Competition, Universidad Adolfo Ibáñez.

Additional Experience

Teaching Assistant	Santiago, Chile
Information Systems — Adolfo Ibáñez University	Aug 2022 — Nov 2022
Teaching Assistant	Santiago, Chile
Operations Management — Adolfo Ibáñez University	Mar 2022 — Jul 2022
