Professional Profile

Industrial Civil Engineer and MSc in Data Science, currently working as a Data Analyst at BHP, with experience developing data solutions in the mining industry. I am motivated by problems that require understanding the business, learning new domains, and building solutions through data. My experience includes automation, data pipelines, analytics, and the development of information tools, working directly with users and stakeholders. I am characterized by curiosity, initiative, and a willingness to take on new challenges, learning throughout the process and connecting technical knowledge with business context.

Professional Experience

BHP

Energy Demand Analyst

Santiago, Chile

Sep 2026 — Present

- Develop data pipelines and models to integrate, transform, and structure energy consumption data from multiple sources and mining operations.
- Collaborate with energy teams and internal stakeholders to understand processes, business rules, and information requirements, translating them into data-driven solutions.

Plusmining

Data Scientist

Santiago, Chile

Feb 2026 — Sep 2026

- Led the development of internal data products, collaborating with senior analysts to translate business intelligence needs into analytical tools used by non-technical users.
- Designed and maintained automated pipelines integrating multiple heterogeneous data sources, reducing manual work by more than 50 hours per month and expanding the scope of analyses by 20%.
- Centralized more than 6 fragmented production processes by deploying a full-stack internal web platform using FastAPI, Next.js/React, OAuth 2.0, and cloud services.
- Built and deployed production-ready LLM agents to support report preparation and review.
- Prepared and presented market intelligence reports combining operational, financial, and strategic analysis.

Data & Market Analyst

Aug 2025 — Feb 2026

- Designed automated workflows to collect, transform, and structure data from multiple external market sources.
- Prepared market intelligence reports and identified trends in production, financial performance, and strategic developments.

Market Analyst

Jan 2025 — Aug 2025

- Automated data collection and consolidation processes and analyzed operational and financial information from domestic and international mining companies.

Junior Analyst Intern

Sep 2024 — Dec 2024

- Collected, validated, consolidated, and analyzed operational data to support client reports, industry benchmarks, and internal research.

Education

Adolfo Ibáñez University

Master of Science in Data Science

Santiago, Chile

Jul 2023 — Jan 2025

- **Thesis:** *Estimation of heavy metal concentrations in tailings deposits using multispectral satellite imagery.*
- Developed and validated supervised machine learning models to estimate metal concentrations in tailings deposits in Chile.
- Tested, compared, and optimized regression models, improving predictive performance by approximately 10%.
- Collaborated with public and private stakeholders to collect, validate, and structure relevant data for the research project.

Adolfo Ibáñez University

Industrial Civil Engineering, Business Analytics

Santiago, Chile

Mar 2019 — Dec 2023

Skills

Data Analytics	Python, SQL, R, pandas, NumPy, exploratory data analysis, data cleaning and transformation, statistical analysis
Machine Learning	scikit-learn, XGBoost, TensorFlow, PyTorch, regression, classification, clustering, time series, feature engineering, model evaluation and validation
Data Engineering	ETL pipelines, BigQuery, PostgreSQL, Google Cloud Platform, REST APIs, structured and un-structured data processing, web scraping
Visualization & BI	Power BI, Tableau, Looker Studio, Plotly, matplotlib
Applied AI	LangChain, LangGraph, Gemini, prompt engineering, information extraction and structuring using LLMs
Software & Cloud	FastAPI, Docker, Google Cloud Run, Git, Next.js, React, TypeScript
Languages	Spanish: Native; English: Full professional proficiency

Awards & Honors

- Academic Excellence Scholarship, Universidad Adolfo Ibáñez, awarded for four consecutive years.
- 2024 Industry Applied Master's Thesis Competition, Universidad Adolfo Ibáñez.

Additional Experience

Teaching Assistant	Santiago, Chile
Information Systems — Adolfo Ibáñez University	Aug 2022 — Nov 2022
Teaching Assistant	Santiago, Chile
Operations Management — Adolfo Ibáñez University	Mar 2022 — Jul 2022
