Professional Profile

Data Scientist with an MSc in Data Science and professional experience building automated data pipelines, web scraping systems, AI-assisted workflows, internal analytics tools, and strategic reporting solutions. Strong technical foundation in Python, statistical modeling, machine learning, data engineering, automation, and data visualization. Currently focused on applying data science to football analytics, including player performance, recruitment, tactical analysis, and decision-support tools. Able to translate complex data problems into clear, actionable insights for technical and non-technical stakeholders.

Key Experience

Plusmining <i>Data Scientist / Data Engineer / Market Intelligence</i> <i>Data Scientist</i>	Sep 2024 — Present Santiago, Chile Feb 2026 — Present
- Architect and deploy a full-stack production system on Google Cloud Run, comprising a streaming FastAPI backend, a Next.js/React frontend, and OAuth 2.0 authentication with domain-restricted access for internal users. - Design and maintain automated data pipelines integrating heterogeneous sources. - Build and deploy production LLM agents using LangChain and LangGraph, enabling automated document review, PDF analysis, real-time web search, and multi-step reasoning over mining industry reports. - Develop domain-specific intelligence systems for global mining markets, including M&A tracking, commodity fundamentals extraction, company prospecting, and internal analytics tools for non-technical users. - Collaborate with analysts and senior stakeholders to translate business intelligence needs into automated data solutions, prioritizing workflows that replace high-effort manual research processes.	
<i>Data & Market Analyst</i>	Aug 2025 — Feb 2026
- Engineer automated data workflows to ingest, process, and structure unstructured market data from multiple external sources. - Produce monthly and semi-annual market intelligence reports assessing production, financial performance, commodity trends, and strategic developments.	
<i>Market Analyst</i>	Jan 2025 — Aug 2025
Automate data collection workflows and analyze operational and financial data across national and international mining companies.	
<i>Junior Analyst Intern</i>	Sep 2024 — Dec 2024
Collect, consolidate, and analyze operational data to support client-facing reports, presentations, industry benchmarks, and internal research outputs.	

Personal Projects

Modeling Defensive Compactness and Breakdowns in the Italian Men's National Team	<i>In progress</i>
Analyze the spatial defensive organization and disruption dynamics of the Italian men's national football team using tracking and event data.	

Education

Universidad Adolfo Ibáñez <i>Master of Science in Data Science</i>	Jul 2023 Jan 2025 Santiago, Chile
Thesis: <i>Estimation of heavy metal concentrations in tailings dams using multispectral satellite imagery.</i> - Developed supervised machine learning models to estimate metal content in tailings deposits in Chile. - Tested and compared regression models, improving predictive performance by approximately 10%. - Worked with heterogeneous geospatial, environmental, and industrial datasets to support predictive modeling tasks. - Collaborated with public and private-sector stakeholders to collect, validate, and structure relevant data for the research project.	
Universidad Adolfo Ibáñez <i>Industrial Civil Engineering, Business Analytics</i>	Mar 2019 — Dec 2023 Santiago, Chile

Skills

Programming Languages	Python, SQL, R, TypeScript, Git
ML & Data Science	pandas, NumPy, scikit-learn, TensorFlow, PyTorch, XGBoost, statistical modeling, regression, classification, clustering, time series, model evaluation, feature engineering
AI & LLM Engineering	LangChain, LangGraph, prompt engineering, AI agent workflows
Full-Stack Development	Next.js, React, FastAPI, Tailwind CSS, REST APIs, Server-Sent Events, async Python, OAuth 2.0, PostgreSQL
Cloud & Data Pipelines	Google Cloud Platform, BigQuery, ETL pipelines, Scrapy, BeautifulSoup, Playwright, structured and unstructured data processing
Visualization	Power BI, Looker Studio, Tableau, Plotly, matplotlib
Languages	Spanish: Native; English: Full professional proficiency

Awards & Recognition

- Academic Excellence Scholarship, Universidad Adolfo Ibáñez, awarded for four consecutive years.
- 2024 Industry Applied Master's Thesis Competition, Universidad Adolfo Ibáñez.

Additional Experience

Teaching Assistant <i>Information Systems — Universidad Adolfo Ibáñez</i>	Aug 2022 — Nov 2022 Santiago, Chile
Teaching Assistant <i>Operations Management — Universidad Adolfo Ibáñez</i>	Mar 2022 — Jul 2022 Santiago, Chile
